undergo surgery to enhance or reconstruct their bodies how does surgery alter a woman's self image how did they face the possibility of debilitating autoimmune disease from rupturing or leaking implants some opted for breast implants after mastectomies others for cosmetic reasons some felt empowered by the surgery being a woman i just like breasts and felt like i got ripped off i did it for myself others were pressured by their husbands he used to make fun of parts of my body and he made me believe that if i was ever to leave him no one would have anything to do with me because i was this deformed type of person after surgery some women were ecstatic while others had a sense of inner conflict about what they had done to themselves were they faking it and a few were angry i was really angry inside that i had had to put plastic bags filled with chemicals in my body in order for me to feel like i could do the hoochie koo on saturday nights i didn't wear tight clothes i didn't want my children to find out now having faced years of medical and personal uncertainty many have coped by reassessing their lives and their relationships by sharing information and support with other women with implants outreach that became a means for self empowerment
